ABOUT ME

I am a Bachelor of Computer Engineering from Jember State Polytechnic with a strong interest in Software Quality Assurance and Web Development. I have experience in creating test plans, designing and executing test cases, preparing Requirement Traceability Matrices (RTM), conducting manual testing, and implementing automated testing using Selenium IDE and Selenium WebDriver.

In addition to software testing, I have strengthened my web development skills through the Front-End and Back-End Web Development learning paths in Coding Camp powered by DBS Foundation, where I successfully completed the required milestones and developed several web-based projects. Through these experiences, I gained hands-on knowledge in building responsive web applications, implementing application features, and understanding modern web development practices using technologies such as PHP, JavaScript, Python, HTML, and CSS.

My combination of quality assurance and web development skills enables me to understand software from both the development and testing perspectives, helping ensure that applications are functional, reliable, and aligned with user requirements. My portfolio can be viewed at: <https://rurin-portofolio.vercel.app/>

EDUCATION

Bachelor of Applied Computer Engineering, Information Technology Department, Jember State Polytechnic

GPA: 3.71 | 2022 - Expected graduation in 2026

Computer Network Engineering, SMK Hidayatus Sholihin, Kediri

Average Grade: 84.21 | 2019-2022

EXPERIENCE

Private Tutor | Juli 2024 – Present

- Provided individualized tutoring for students elementary and junior high school levels.
- Develop engaging learning strategies and monitor student progress.
- Improve communication, problem-solving, and mentoring skills through one-on-one instruction.

Programmer Intern – PLN UP2D JAWA TIMUR | Juli 2025 – November 2025

- Developed a web-based monitoring application for analyzing electrical load data from SCADA systems.
- Implemented dashboards and data filtering features to support operational monitoring.
- Performed functional testing and validated system requirements.

Computer Technician Intern – Raharja Komputer Kediri | Januari 2021 – Mei 2021

- Performed hardware and software installation, maintenance, and troubleshooting.
- Assembled and upgraded desktop computers based on customer requirements.
- Provided technical support and customer service assistance.

PROJECTS

Software Quality Assurance (SQA) – AMetative HLE | 2026

Github : <https://github.com/RurinHaliza/selenium-pytest-automation.git>

- Prepared Test Plan and Requirement Traceability Matrix (RTM) documents based on system requirements.
- Executed 180+ test cases and automated test script using python and Selenium WebDriver as testing tools.
- Conducted functional and regression testing to validate system functionality and requirement compliance.
- Created bug reports, test reports, and release notes to support software quality assurance and release management.

Full Stack Web Developer – StoryApp | 2025

Github : <https://github.com/RurinHaliza/Dicoding-Project-Akhir-Intermediate>

- Developed a Progressive Web App (PWA) with SPA architecture using JavaScript, Webpack, and REST API integration.
- Implemented offline support, Push Notifications, IndexedDB, and interactive map features.
- Conducted functional testing to validate application features and user workflows.

Back-End Web Developer – NotesApp | 2025

Github : <https://github.com/RurinHaliza/Dicoding-Notes-App-2->

- Developed a web-based note management application using REST API integration.
- Implemented key features including note creation, retrieval, and deletion through Fetch API.
- Conducted functional testing to validate application features and API interactions.
- Used JavaScript, HTML, CSS, Web Components, Webpack, and asynchronous API communication.

AI Engineer, Data Analyst & Tester – Silombok | 2024

Github : <https://github.com/RurinHaliza/SiLombok.git>

- Collaborated with a team to develop an IoT-based monitoring system for chili disease detection and automatic irrigation.
- Dataset Collection: Collected and prepared chili image datasets for machine learning model training.
- Machine Learning Model: Built a Naïve Bayes classifier for healthy and rotten chili detection.
- System Testing: Conducted Black Box Testing to ensure system functionality and reliability.

Document Management & Tester – Efiasi | 2024

Test Documentation : <https://tinyurl.com/Efiasi-Testing>

- Collaborated with a team of six to develop a mobile application integrated with the Eviasi web platform.
- Contributed in defining application concepts and user interface requirements based on user needs.
- Maintained project logbooks and prepared final project documentation.
- Implemented user login functionality and performed API testing using Postman.
- System Testing: Performed Black Box Testing to validate system functionality.

Software Quality Assurance – ArenaFinder | 2023

Test Documentation : <https://tinyurl.com/ArenaFinder-Testing>

- Developed test documentation including RTM, final reports, and user manuals.
- Designed and executed unit, integration, system, and user acceptance testing (UAT).
- Performed manual testing using Black Box Testing techniques and automated test scenarios using Selenium IDE.
- Identified, documented, and tracked defects throughout the software testing lifecycle.

System Analyst, Document Management & Tester – GrosApp | 2023

- Developed a sales management system with a team of 5.
- Managed project documentation, including Trello logbooks, final reports, and user manuals.
- Designed and implemented the application database using MySQL.
- System Testing: Performed Black Box Testing to validate application functionality.

System Analyst, Document Management & Tester – Pusat Oleh-Oleh | 2022

- Collaborated with the project team to develop a Java-based desktop application using NetBeans.
- Designed ERD diagrams and implemented the application database using MySQL.
- Coordinated project documentation, including final reports and user manuals.
- Performed Grey Box Testing to validate application functionality and internal workflows.

CERTIFICATE

- Front-End and Back-End Web Development Competency Certificate | **July 2025**
- Certificate Of Competency | **June 2022**
- Industrial Work Practice (PKL) Certificate | **May 2021**

SKILLS

Software Testing | Selenium | Laravel | React.js | Tailwind CSS | JS | HTML | CSS | PHP | Python | MySQL | Rest API | GitHub | Ms. Office | System Analyst | Team Collaboration | Analytical Skills
